

**3,500lb. ADVANCED Design**  
Axle Assembly

**WHO IS DESIGNING YOUR AXLE?**

**Introducing the 3.5K  
ADVANCED Design Axle**

While other suppliers continue to sell the same products, AL-KO works to make ours smarter, stronger and more durable.

## Performance AD✓ANTAGES

- ✓ Advanced friction material provides greater stopping power
- ✓ New backing plate design provides superior brake consistency
- ✓ 10 lbs. per axle lighter (available in both leaf spring & rubber torsion)

## Compatibility AD✓ANTAGES

- ✓ Continued use of industry standard 3.5K bearings and seal
- ✓ Spindle design interchangeable with all 3.5K allowing earlier components
- ✓ Brake Flange placement and bolt pattern interchangeable with prior 3.5K axles
- ✓ New 3.5K Advanced Design brake allows the use of 10" x 2.25" (old style)
- ✓ 3.5K 10" x 2.25" (old style) drums and brake assemblies can be used in combination on 3.5K Advanced Design axle beam (Only in pairs, substitutions/replacements should never be done to just one side of axle)
- ✓ Advanced Design 3.5K brake and drum combination can be retrofitted on any existing AL-KO axle for increase performance.

AL-KO Advanced Design 3.5K  
30% Better

The 3.5K **AD✓ANCED** Design axle utilizes a newly created 1.75" brake and 10" brake drum, making it the latest example of innovation from AL-KO.

Current Industry Standard 3.5K

Building strength into key components without waste makes the 3.5K **AD✓ANCED** Design axle a true combination of performance and efficiency.

Chart is based on actual test data performed at and witnessed by the Bosch Automotive Proving Grounds. New brake has met all CSA\* tests and standards for approval as well as AL-KO's more rigorous tests.

\*CSA (Canadian Standard Association)

**AL-KO's commitment is to deliver innovative quality domestic products in order to give our customers**
